PROFESSIONAL SUMMARY

Information Science & Engineering graduate and Junior Software Engineer with hands-on experience in **Java, Spring Boot, Python, Frappe, REST APIs, and SQL**. Experienced in backend development, payment gateway systems, API integration, business application development, and debugging. Strong knowledge of **OOP, JWT authentication, RBAC, Spring Security, database management, and software development practices**.

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, HTML, CSS

Backend: Spring Boot, JDBC, REST APIs, FastAPI, Frappe Framework

Databases: MySQL, PostgreSQL

Security: JWT, RBAC, Spring Security, Authentication & Authorization, Cybersecurity, Network Security, Web Application Security

Tools: Git, GitHub, Docker, Maven, Postman, Kafka, Redis, n8n, VS Code

Concepts: OOP, API Integration, Backend Development, Database Management, Debugging, Agile Development

EXPERIENCE

Junior Software Engineer — Quantumberg Technologies Pvt. Ltd.

Aug 2026 – Present

Bengaluru, Karnataka

- Developing and customizing business applications using **Python, JavaScript, HTML, CSS, and Frappe Framework**.
- Implementing **DocTypes, forms, validations, workflows, and server-side business logic** for application modules.
- Developing and integrating **REST APIs**, debugging application issues, and enhancing existing modules.

Software Engineering & Systems Intern — Levant Private Limited

Apr 2026 – Jul 2026

- Developed backend modules using **Java, JDBC, and MySQL** for FinTech and payment-related applications.
- Built **REST APIs, webhooks, and third-party API integrations** for payment workflows.
- Worked on database operations, SQL queries, backend business logic, debugging, and performance improvements using **Git and Agile practices**.

Cybersecurity, AI & Networking Intern — Airowire Networks Pvt. Ltd.

Nov 2025 – Apr 2026

- Worked with cybersecurity, networking, AI, and cloud technologies through practical technical activities.
- Gained exposure to **WAF, DLP, IAM, API Security, SIEM/SOAR, Endpoint Security, SD-WAN, and Zero Trust Architecture**.
- Studied vulnerability assessment, network security, and web application security.

PROJECTS

Levant Payment Gateway

Apr 2026

Java — Spring Boot — PostgreSQL — Docker — REST APIs — Postman

- Developed backend modules covering **merchant onboarding, payment initiation, REST APIs, and callback handling**.
- Implemented authentication, database operations, payment processing workflows, and API testing using **Postman**.

User Management Dashboard (RBAC)

Apr 2026

Spring Boot — React.js — MySQL — JWT — Spring Security

- Developed a secure **Role-Based Access Control system** with JWT authentication and user, role, and permission management.
- Implemented REST APIs using **Spring Security** with permission-based protected routes.

AI Workflow Automation

Mar 2026

n8n — JavaScript — OpenAI API — Google Sheets — PDF API

- Built an automated shipping-label workflow integrating **Google Sheets, OpenAI API, PDF generation, and email**.
- Automated data processing, label generation, PDF creation, and delivery using **n8n and JavaScript**.

SmartCartX – Intelligent Trolley

May 2025

IoT — Sensors — Smart Retail — Billing System

- Designed a smart shopping trolley prototype with sensors for **automatic product detection and real-time billing**.
- Created a user interface displaying item details and total cost to improve checkout efficiency and user experience.

ATM Simulator System

Aug 2023 – Dec 2023

Java — JDBC — MySQL

- Developed a desktop ATM application supporting **authentication, transactions, and account management**.
- Integrated Java with MySQL using **JDBC** for reliable data handling and backend operations.

Result Analysis System

HTML — CSS — JavaScript

- Built a web-based student result management application with **automated grade calculation and performance visualization**.
- Developed a responsive interface to simplify data entry and improve accessibility.

EDUCATION

B.E. – Information Science & Engineering

2022 – 2026

BLDEACET College of Engineering and Technology, Vijaypur

CGPA: 8.2/10.0

CERTIFICATIONS

AWS Training & Certification – Fundamentals of Machine Learning and Artificial Intelligence — AWS

Java Programming – Beginner to Master — Udemy

Java Fundamentals Course for Beginners — Udemy

Tata – Cybersecurity Security Analyst Job Simulation — Forage

Java Programming Intern — Cognifyz Technologies

Web Development Intern — System Tron
